2020 Tax Rate Calculation Worksheet

General Information: Tax Code Section 26.04 (c) requires an officer or employee designated by the governing body to calculate the no-new-revenue (NNR) and the voter approval tax rate for the taxing unit. These tax rates are expressed in dollars per \$100 of taxable value calculated. The calculation process starts after the chief appraiser delivers to the taxing unit the certified appraisal roll and estimated values of properties under protest. The designated officer or employee shall certify that the officer or employee has accurately calculated the tax rateand used values shown for th certified appraisal roll or certified estimate. The officer or employee submits the rates to the governing bodyby Aug. 7 or as soon thereafter as practicable.

Taxing Unit Name: High Plains Water District Date Prepared: August 5, 2020

SECTION 1: No-New-Revenue Tax Rate

The NNR tax rate enables the public to evaluate the relationship between taxes for the prior year and for the current based on a tax rate that would produce the same amount of taxzes (no new taxes) if applied to the same properties that are taxed in both year. When appraisal values increase, the NNR tax rate should decrease.

SECTION 2: Voter-Approval Tax Rate

The voter-approval tax rate is the highest tax rate that a taxing unit may adopt without holding an election to seek voter approval of the rate. The voter-approval tax rate is split into two separate rates:

- 1. Maintenance and Operation (M&O) Tax Rate: The M&O portion is the tax rate that is needed to raise the same amount of taxes that the taxing levied in the prior year plue the applicable percentage allowed by law. This rate accounts for such things as salaries, utilities and day-to-day operations.
- 2. **Debt Rate:** The debt rate includes the debt service necessary to pay the taxing unit's debt payments in the coming year. This rate accounts for principal and interest on bonds and other debt secured by property tax revenue.

The voter-approval tax rate is the sum of the voter-approval tax rates calculated for each type of tax the county levies. In most cases the voter-approval tax rate exceeds the no-new-revenue tax rate, but occasionally decreases in a taxing unit's debt service will cause the NNR tax rate to be higher that the voter-approval tax rate

SECTION 3: NNR Tax Rate and Voter-Approval Tax Rate Adjustments for Additional Sales Tax to Reduce Property Taxes

Cities, counties and hospital districts may levy a sales tax specifically to reduce property taxes. Local voters by election must approve imposing or abolishing the additional sales tax. If approved, the taxing unit must reduce its NNR and voter approval tax rates to offset the expected sales tax revenue. This section should only be completed by a county, city or hospital district that is required to adjust its NNR tax rate and or voter-approval tax rate because it adopted the additional sales tax.

SECTION 4: Voter-Approval Rate Adjustment for Pollution Control

A taxing unit may raise its rate for M&O funds used to pay for a facility, device or method for the control of air, water or land pollution. This includes any land, structure, building, installation, excavation, machinery, equipment or device that is used, constructed, acquired or installed wholly or partly to meet or exceed pollution control requirements. The taxing unit's expenses are those necessary to meet the requirements of a permit issued by the Texas Commission on Environmental Quality (TCEQ). The taxing unit must provide the tax assessor with a copy of the TCEQ letter of determination that states the portion of the cost of installation for pollution control.

This section should only be completed by a taxing unit that uses M&O funds to pay for a facility, device or method for the control of air, water or land pollution.

	Line 48, Line 49 (counties) or Line 57 (taxing units with the additional sales tax).	

SECTION 5: Voter-Voter-Approval Tax Rate Adjustment for Unsuded Increment Rate

The unused increment rate is the rate equal to the difference between the adopted tax rate and voter-approval tax rate before the unused increment rate for the prior three years. In a year where a special taxing unit adopts a rate above the voter-approval tax rate by applying any portion of the unused increment rate, the unused increment rate for that year would be zero. Consult with legal counsel to ensure appropriate calculation of the unused increment rate. For each tax year before 2020, the difference between the adopted ta rate and voter-approval rate is considered zero, therefore the unused increment rate for 2020 is zero.

This section should only be completed by a taxing unit that does not meet the definition of a special taxing unit.

SECTION 6: De Minimis Rate

The de minimis rate is the rate equal to the sum of the no-new-revenue maintenance and operations rate, the rate that will raise \$500,000, and the current debt rate for a taxing unit. This section should only be completed by a taxing unit that is a municipality of less that 30,000 or a taxing unit that does not meet the definition of a special taxing unit.
